

# Design Thinking at DPGITM

Empowering Minds | Enhancing Innovation | Engineering Solutions

---

## What is Design Thinking?

**Design Thinking** is not just a process—it's a **mindset**, a way to see the world, solve problems creatively, and design human-centric solutions. Whether you're an engineer, entrepreneur, doctor, manager, or artist—**Design Thinking** helps you think out of the box and drive impactful innovation.

At **DPGITM**, we believe that future-ready graduates are not only tech-savvy but also empathetic thinkers and agile innovators. That's why **Design Thinking** is integrated as a core module in CSE/ CSE-AIML/ CSE-DS.

## Why Design Thinking Matters in Every Field

-  **Encourages creative confidence** and innovation
-  **Builds empathy and user-first mindset**
-  **Develops critical thinking & collaboration** skills
-  **Applies structured problem-solving** to real-world challenges
-  **Highly valued by top employers** across the globe

## Certification from NPTEL – Recognized Nationwide

We proudly support our students to earn **NPTEL Certification** in **Design Thinking**, powered by IITs & AICTE. This certification adds a **recognized academic and professional edge** to every resume.

## Hands-On Activities That Bring Concepts to Life

At DPGITM, **Design Thinking is not just taught – it's experienced**. Our students participate in engaging, real-world simulations that develop both mindset and skill set.

## Ready to be a thinker, creator, and leader of tomorrow?
